English

• **Advanced Kevlar and Fiberglass Matrix Composite Weave Shell**: Lightweight, superior fit and comfort using advanced CAD technology.
• **One-touch Integrated Sunlight film**: Smoke-tinted 3-stage adjustable Sunlight film deploys quickly and easily (U.S. PAT. #7,540,033).
• **Optically superior anti-fog lens prepared Faceshield**: New 3D design, an anti-scratch coating and is prepared for the ultimate anti-fog lens insert.
• **UV-treated Flip-up Faceshield**: Opens easily.
• **QuickSlide™ Shield Replacement System**: Quick, secure, tool-less removal and installation.
• **“ACS” Advanced Channeling Ventilation System**: Full front to back airflow flushes heat and humidity up and out.
• **SilverCool™ Interior**: Moisture-wicking and odor-free interior with advanced silver anti-bacterial fabric. Crown and cheek pads are removable and washable.
• **WIND TUNNEL TESTED**

Français

• **Coque fabriquée en fibre de verre et kevlar**: légère, ajustement et confort supérieur, utilise la technologie avancée CAD.
• **Bouton de réglage de lunette de protection solaire intégré**: L’écran de lunette de protection solaire tourné-3 positions- se déploie rapidement et facilement (U.S. PAT. #7,540,033).
• **Ecran pour anti-fog lens avec une bonne visibilité**: Nouveau design 3D, traitement anti-rayures et préparé anti-fog lens.
• **Ecran traité UV**: ouverture facile.
• **Système de remplacement de l’écran QuickSlide™**: Rapide, sécurisé, Montage et démontage plus facile.
• **Système de ventilation à canaux (ACS)**: permettant de remonter et d’extraire la chaleur et l’humidité.
• **Intérieur en Silver Cool™**: sans moisissures et sans odeur, intérieur avec un tissus argenté antibactérien. Intérieur démontable et lavable.
• **Testé en soufflerie**

Deutsch

• **Hochentwickelte Kevlar/Fiberglas-Matrix Verbundscheibe**: leicht, exzellente Passform, Tragekomfort durch Anwendung der CAD-Technologie.
• **Einhänd Sonnenblende integriert**: getönte, einstellbare Sonnenblende (U.S. PAT. #7,540,033).
• **UV-behandeltes, klappbares Visier**: leicht zu öffnen.
• **Einhänd-Visierwechsel-System**: Schnell, Sicher, werkzeuglose Montage und Demontage.
• **“ACS” Hochentwickeltes Windkanal-System**: nach hinten gerichteter Luftstrom verleiht breithüftige und komfortable Kühlung.
• **Silver Cool™ Innenausstattung**: Feuchtigkeit und Geruch absondernde antibakterielle Materialausstattung, Kopf- und Wangenpolster austausch- und waschbar.
• **Windkanal-getestet**
Español

- Calota con matriz de entramado compuesto de kevlar de última generación y fibra de vidrio: Ligero, gran diseño y comodidad utilizando tecnología CAD avanzada.
- Mecanismo integrado para el reglaje de las gafas de protección solar: 3 posiciones en el ajuste de las gafas de protección solar, de rápido y fácil uso (U.S. PAT. #7,540,033).
- Pantalla preparada para anti-fog lens y de alta calidad óptica: Nuevo diseño 3D, con revestimiento anti-arañazos y preparado para la inserción del mejor anti-fog lens.
- UVtreated Flip-up Pecashield: Se abre con facilidad
- Mecanismo de pantalla QuickSlide™: rápido, seguro, de montaje y desmontaje fácil.
- Sistema avanzado "ACS" de canalización de la ventilación: desvía y expulsa hacia fuera todo el calor y la humedad del flujo de aire.
- SilverCool™ Interior: humedad-wicking y lubrica el ojo interior con el avanzado tejido de anti-bacterias plata. Interiores desmontables y lavables.
- Probado en el túnel del viento

Dutch

- Geavanceerde helmachsel vervaardigd van Kevlar en Fiberglas Matrix Composite: Lichtgewicht, perfecte pasvorm en comfort door het gebruik van geavanceerde CAD technologie.
- Geïntegreerd zonnevisier met 1 hands systeem bovenop de helmachsel: Het gepatenteerde zonnevisier schiet met 1 druk op de knop automatisch de helmachsal in (U.S. PAT. #7,540,033).
- Voorzien van een anti-fog lens voorbereid visiel: Nieuw 3D ontwerp, anti-kras coating en voorbereid om de uiterste anti-condens anti-fog lens te monteren.
- UV-beschermend flip-up scherm: makkelijk te openen.
- QuickSlide™ visier systeem: snel, secuur, zonder gereedschap verwijderen en installeren.
- "ACS" Advanced Channeling System: Volledige luchtdoorstroming van voor naar achter wat helpt en vocht de helm in/s uit voert.
- In de windtunnel getest

Italian

- Calotta in Fibra Composita: Ultraleggero, massima vestibilità e comfort.
- Occhiali da sole integrati: Sistema di apertura e chiusura rapida degli occhiali da sole (U.S. PAT. #7,540,033).
- Visiera anti-fog lens di alta qualità ottica: Nuovo design 3D, finitura anti-graffio e predisposizione per lente anti-fog lens.
- Visiera con trattamento anti UV e sistema Flip-up.
- Meccanismo visiera QuickSlide™: veloce, semplice, sicuro.
- Sistema di ventilazione "ACS" Advanced Channeling Ventilation System; areazione completa che permette la fuoriuscita del caldo e dell'umidità.
- Imbottitura SilverCool™: imbottitura in tessuto antibatterico e traspirante. Imbottitura interna e guanciali sono rimovibili e lavabili.
- TESTATO IN GALLERIA DEL VENTO

Important Safety Information

**WARNING**
The instructions in this manual are designed to help you select the right helmet, wear it properly, take care of it, and know when to replace it. Failure to follow these instructions may increase your risk of serious injury or death in an accident.

In order to get the most protection possible from your helmet, you should always do the following:
- **Wear your helmet when you ride.**
- **Handle your helmet carefully to avoid accidental damage.** and
- **Ride safely — do not take risks because you are wearing a helmet.**

Although your HJC helmet is designed to reduce or prevent some injuries when worn, no helmet can protect you from all possible or foreseeable impacts. For example, your helmet cannot protect you from spinal or neck injuries. In addition, there is no guarantee that your helmet will PREVENT injuries to the area of your head that is covered. A low speed accident may even result in serious injury or death.

Selecting the Right Helmet

**WARNING**
This helmet does not provide as much coverage or protection as a full face helmet. You can get more protection by purchasing a helmet with greater head coverage.

**WARNING**
Never buy a used helmet or borrow someone else's helmet. Over time the protective foam in helmets will adjust to the contours of a user’s head. A used or borrowed helmet may not offer as much protection as a new helmet.

**WARNING**
Wearing the wrong size helmet can increase your risk of serious injury or death in an accident. A helmet that is too large for your head may be dislodged or knocked off in an accident. To select the right size helmet for your head, follow these instructions:

1. **Measure your head.** Wrap a tape measure around your head about one inch (2.5 cm) above your eyebrows.

2. **Use the sizing chart** to select the helmet size that corresponds most closely to your head measurement. If your head size falls between two helmet sizes, try on the larger helmet first and then the smaller size.

**Sizing Chart**

<table>
<thead>
<tr>
<th>Size</th>
<th>XS</th>
<th>S</th>
<th>M</th>
<th>L</th>
<th>XL</th>
<th>XXL</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inch</td>
<td>21 1/4</td>
<td>21 1/2</td>
<td>22</td>
<td>22 1/2</td>
<td>22 3/4</td>
<td>23</td>
</tr>
<tr>
<td>CM</td>
<td>54-56</td>
<td>55-57</td>
<td>58-59</td>
<td>60-61</td>
<td>62-63</td>
<td></td>
</tr>
</tbody>
</table>

3. **Try on the helmet** by grasping both chin straps to pull the helmet completely onto your head, ensuring that the top of your head is in contact with the top of the helmet interior.

4. **Check for a proper fit.** To make sure your helmet is the right size, check that:
   - The helmet inner lining fits snugly around your head.
   - The top pad presses firmly on your head.
   - The cheek pads contact your cheeks.
   - There is no space around your brow under the inner lining. Test this by trying to insert your fingers.

   If the helmet does not fit snugly, try on a smaller size.

5. **Check your field of vision when trying on a helmet.** Some helmets may obstruct or block your vision when looking left, right, up, or down.

**WARNING**
Always make sure you can see well enough to safely operate your motorcycle.

Specifications

- Outer Shell
- Sunlight film Release Button
- Sunlight film Lever
- Rear Venturi Exhauster
- Impact Absorbent Liner
- Comfort Liner
- Rubber Edge Trim
- Chin Strap
- Micro Buckle
- Tool-less Shield
- Sunlight film
- Eyeport Gasket
- Shield Ratchet
- Top Side Vents
- Top Front Vent
- Anti-fog lens pins
# Using Your Helmet Correctly

**WARNING** To reduce the risk of serious injury or death and to help prevent damage to your helmet:

- **Never adjust your helmet accessories while riding** — Only make helmet adjustments when stopped.
- **Never drop your helmet** — Dropping your helmet may crack the shell or damage the protective foam. The damage may not be visible. Your helmet is only designed for one impact. Refer to “Helmet Replacement (p. 15)” for more information on what to do after helmet has been dropped.
- **Never wear anything between your head and your helmet** — This may reduce the effectiveness of your helmet.
- **Never hang or hook your helmet on anything including mirror stalks or sissy bars** — Doing so may cause damage to the helmet protective foam or liner.
- **Never use insect repellent on or around your helmet** — Insect repellent may damage your helmet’s shield, shell, protective foam, or other components.
- **Never expose helmet to gasoline or gasoline fumes** — Gasoline may damage your helmet’s shield, shell, protective foam, or other components.
- **Never use a dark or tinted face shield at night or in low visibility conditions.**
  
  - If you have any questions on what other substances may damage your helmet, please contact us.
- **Always wear eye protection** — If you are not using a helmet with a face shield, always wear eye protection when riding. Always lock your face shield in place when you are riding.
- **Always be alert for sounds** — Your helmet may impair your hearing. However, your helmet is not a form of hearing protection.
- **Always store your helmet in its helmet bag** when not in use to help reduce accidental surface damage.

**WARNING** To reduce the risk of serious injury or death, always use your helmet correctly.

## Inspect your helmet

To ensure that your helmet is in the best condition to maximize your protection, always inspect your helmet for damage before riding:

- **Check the shield and shield ratchet** — re-tighten shield ratchet screws if necessary. Be sure not to over-tighten any screws. Plastic base plate screws can break and plastic screws can strip the screw sleeves if over-tightened.
- **Check for helmet damage**. If your helmet is damaged or cracked, stop using it immediately. See “Helmet Replacement” (p. 15) section for further information. If your helmet has been dropped, you may not be able to see the damage.
- **Check for worn or damaged parts**. Plastic components may wear out over time. If you find worn or damaged parts, replace them or purchase a new helmet. See “Replacement Parts” (p. 15) for information on parts replacement.

**WARNING** If parts fall off while riding, your vision may be blocked which could cause an accident.

- **Check the retention system (chin strap) for damage**. If it is frayed or ripped, replace the helmet.
- **Check that all pads are in place**. Both of the cheek pads and the crown pads must be in place.

### Check Your Face Shield

If your face shield is scratched or damaged it may reduce the visibility — replace if necessary. Always make sure you can see well enough to safely operate your motorcycle.

### Fasten the Retention System

Fasten the retention system (chin strap) as tight as possible under your jaw without causing pain. There must be no slack in the strap, and the strap must be snug up against your jaw. If the retention system is not tight, your helmet may become dislodged or knocked off in an accident.

---

# Maintaining Your Helmet Correctly

## Shell Cleaning

**WARNING** Only use the approved methods listed below to clean the helmet. Using other unapproved chemicals or methods may damage the helmet shell or lining. A damaged helmet may increase your risk of serious injury or death in an accident.

### Glossy Finish

HJC recommends cleaning your helmet with products designed for automotive cleaning and polishing. All HJC helmets are finished with an automotive type base coat/clear coat finish. Rubbing compounds can be used for deep cleaning to remove any scratches and scuffs. Follow the product’s instructions diligently. Over polishing with rubbing compounds can cause light abrasions which may dull the finish of your helmet. Stickers and decals will leave adhesive residue when removed. To remove the adhesive residue, use alcohol swabs. Be certain to immediately wipe away the excess liquid and clean the area with soap and water once the adhesive residue is removed. Do not use excessive pressure while rubbing when attempting to remove the adhesive residue, instead use multiple light treatments.

### Non-Glossy Finish

For our flat finish (non-glossy) helmets, we recommend using warm water and mild soap. Use multiple treatments for heavier dirt. Do not use excessive pressure or rubbing compounds while cleaning the surface as a "glossy" effect could be created, ruining the flat finish appearance.

## Interior Cleaning

Although we recommend changing a helmet every 3 to 5 years, the accumulation of sweat, humidity, and dirt can deteriorate the fabric and stitching and this may cause odor. To wash HJC removable pads, HJC recommends regular machine washing and air drying. For non-removable interiors, HJC recommends using bacteria and mildew eliminating products such as "Helmet Fresh".

### Vent Cleaning

Dirt and debris can find its way into the venting of your HJC helmet. Compressed air cans used for cleaning computer keyboards may be used to blow the debris from the ventilation system. It is recommended that you remove any removable pads before doing this process.

---

---

---
**Shield Removal**
1. Open the shield to its maximum open position. Do not force.
2. Move the handle-locker to the open position.
3. The shield will be automatically released out of the base ratchet mechanism.

![Shield Removal Diagrams](image)

**Shield Installation**
1. Ensure that the handle-locker is in the open position.
2. Align and insert the top of the shield guide into the plate-gear guide.
3. With the guides properly aligned, press the lower section of the shield into the Plate-Gear mechanism. The locking tab should pop into position, locking the shield into place.

![Shield Installation Diagrams](image)

**Cheek Pad Installation**
1. Feed the chin strap through the opening in the cheek pad.
2. Align and fully slide the cheek pad plastic plate between shell and EPS.
3. Clip the cheek pad’s 3 small male snaps to the 3 female snaps fixed on the shell interior.

![Cheek Pad Installation Diagrams](image)

**WARNING** Always check to make sure helmet pads are installed before using the helmet. A helmet with missing or improperly installed pads may increase your risk of serious injury or death in an accident.

**Crown Pad Removal**
1. To properly remove the crown pad plastic sleeve, slightly lift the plastic shell base in the order of A, B, C and gently pull the crown pad fabric.
2. Slightly lift part ‘D’ and separate by pulling the crown pad fabric. (Repeat on the opposite side)
3. Simply pull the crown pad fabric in the rear and it will be released.

![Crown Pad Removal Diagrams](image)

**Cheek Pad Removal**
There are 3 snaps holding the cheek pad in place.
1. Gently pry the cheek pad away from the interior, releasing the snaps.
2. Grasp the cheek pad near its center and gently pull it free from the chin strap.
Crown Pad Installation
1. Align and insert crown pad plastic sleeves under the slot located on the crown pad’s plastic base. Press the snap into place.
2. Slightly lift part 'A' and insert the plastic sleeve inward. (Repeat on the opposite side)
3. Align and snap the two rear snaps into place.

WARNING
Try not to operate the sunlight film while riding as this may impair your vision and may lead to an accident.
DO NOT pull on the sunlight film when it is already down. The sunlight film may be ejected and this will increase the risk of serious injury or death in the event of an accident.
DO NOT attempt to adjust the sunlight film with your hands. Always use the sunlight film lever and the sunlight film release button located at the top of the helmet.
The sunlight film is only for day time use. The sunlight film does not provide eye protection. When you use the sunlight film, be sure that the clear visor is also in closed position.

Sunlight film Operation
There are three positions for the sunlight film sliding lever.
Stage 1—Standard position: works best for leaned forward riding position (sportbikes) and when more nose clearance is desired.
Stage 2—Lower position: works best for more upright riding position (cruisers and touring bikes).
Stage 3—Lowest position: Used primarily for sunlight film removal and replacement. Release button must be held down to get to Stage 3.

Sunlight film Removal
1. Grasp and pull the center of the sunlight film by reaching inside the helmet through the bottom opening.
2. With the center portion of the sunlight film released from its mount, pull the sunlight film completely free from the helmet through the eye port.

Sunlight film Installation
1. While holding up the sunlight film lever at the stage 3 then push down the sunlight film release button. This will push out the receiver.
2. Push each side into place, aligned with the pivot tabs.
3. While holding down the sunlight film release button with the sunlight film lever at the stage 3, use other hand to buckle up the center portion of the sunlight film.

* Make sure tabs & center buckle are secure in order for sunlight film to function properly.
Replacement Parts

**WARNING** Use of replacement parts not manufactured by HJC may increase your risk of serious injury or death in an accident. Only use HJC parts that are specifically designed to work with this helmet.

Do Not Modify Your Helmet

Your HJC helmet is designed to meet ECE R 22-05 standard. Contact HJC Europe for more information about the ECE R 22-05 standard.

Modifying your helmet may increase your risk of serious injury or death in an accident. Do not modify your HJC helmet. Modifications include the following:
- drilling holes;
- cutting shell, liner, or strap;
- modifying the retention system, including adding a chin cup;
- removing parts;
- painting; and
- attaching accessories that are not manufactured by HJC for this helmet.

If you have questions about modifications, please contact HJC Europe. See back cover for contact information.

Storing Your Helmet Correctly

**WARNING** An improperly stored helmet can become damaged and may increase your risk of serious injury or death in an accident. You should:
- Store helmet in a cool and dry place,
- Keep helmet away from pets and other animals,
- Keep helmet away from heat in excess of 50°C and do not set on or near hot surfaces.
- When helmets left out in the sun for extended periods of time, it may fade overtime.

Helmet Replacement

**WARNING** Although your HJC Helmet is constructed with the best materials available to offer a long-lasting product, it will eventually need to be replaced. Immediately replace your helmet if:
- It has suffered an impact. Your helmet is only designed for ONE impact. An impact may fracture the outer shell or compress the impact absorbing liner. You may not be able to detect this damage. Any impact in a crash or a drop from as low as 4 feet is enough to damage your helmet.
- The shell, lining, or retention system is damaged. The helmet shell, the impact absorbing lining, and the retention system must be in good condition to provide you with the most protection.

Even if your helmet has not been damaged, it needs to be replaced every 3 to 5 years depending on how much you use it. Over time, UV rays and adhesive and component aging will damage your helmet. Wearing a damaged helmet may increase your risk of serious injury or death in an accident.

If you are unsure if you need to replace your helmet, contact HJC Europe before using your helmet again.

Helmet Disposal

**WARNING** If you buy a new helmet, destroy the old one to ensure it cannot be reused. Do not sell or give away your old helmet, even if it has not been damaged. Over time the protective foam in the helmet will adjust to the contours of your head. If someone else uses this helmet it will not provide them with as much protection.

Warranty

HJC hereby extends a limited warranty to the purchaser of a HJC helmet that the helmet is free of defects in materials and workmanship.

Coverage

This warranty is applicable to manufacturer’s defects only and is good up to one year from the date of purchase. It does not apply to any problems arising out of wearer’s misuse, negligence, modifications, accidents, etc.

Disclaimer

Any warranty of merchantability and any implied warranty are hereby expressly disclaimed. In addition, HJC shall not be liable for any consequential damages.

Procedure

In order to receive warranty, please take your helmet, your receipt showing the date of purchase, and a brief memo that includes a description of the problem, your name, and phone number to the authorized HJC dealer from which you purchased your helmet.
